

EKAANKSH PATIL

DevOps Engineer | AI Developer | Software Developer

+91 9321256484 | patilekanksh487@gmail.com | linkedin.com/in/ekanksh-patil | github.com/Ekaanksh-dev |
Mumbai, Maharashtra

PROFESSIONAL SUMMARY

Motivated BSc IT student (CGPA: 7.50) with hands-on experience building AI-powered DevOps tools, CI/CD pipelines, and automation systems. Proven ability to integrate large language models (LLaMA 3.3 70B via Groq API) into real-world DevOps workflows. Skilled in Docker, Jenkins, GitHub Actions, Linux administration, Python scripting, and cloud infrastructure. Actively seeking a DevOps, AI, or Software Developer internship to contribute to scalable, intelligent infrastructure projects.

TECHNICAL SKILLS

DevOps & CI/CD: Docker, Jenkins, GitHub Actions, CI/CD Pipelines, Nginx, Shell Scripting

Cloud & Infra: AWS (EC2, S3), Linux Administration, Networking, Kubernetes (Learning)

Programming: Python, Java, JavaScript, Bash/Shell

AI & ML: Groq API, LLaMA 3.3 70B, Ollama, AI Agent Development, eBPF

Databases: MariaDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Docker Compose

Concepts: Microservices, Infrastructure as Code, Agile, REST APIs, System Design

EXPERIENCE

CSRBOX Foundation — IBM SkillsBuild / AICTE

Mar 2026 – Apr 2026

AI Strategy & Business Intelligence Intern

Remote

- Completed a 6-week intensive AI internship in collaboration with IBM SkillsBuild and AICTE, focusing on AI strategy frameworks and business intelligence methodologies.
- Analyzed real-world AI adoption case studies across industries including healthcare, finance, and logistics, identifying implementation challenges and ROI metrics.
- Developed strategic recommendations for AI integration using IBM's enterprise AI tools and BI dashboards.

PROJECTS

DevOps AI Notifier

2025

Python · GitHub Actions · Groq API · LLaMA 3.3 70B · Gmail SMTP

- Built an AI-powered CI/CD notification system that automatically analyzes every GitHub commit using LLaMA 3.3 70B via Groq API and delivers plain-English build summaries to developers via Gmail SMTP.
- Integrated GitHub Actions workflow triggers with Python-based AI processing pipeline, reducing commit analysis time from manual review to under 10 seconds.
- Implemented intelligent error detection and natural language reporting, improving team awareness of build failures and code quality issues.

Two-Tier Web Application with Jenkins CI/CD

2025

Docker · Docker Compose · Jenkins · Node.js · Express · Nginx

- Architected and deployed a fully containerized two-tier application using Docker Compose, with Nginx as a reverse-proxy frontend and Node.js/Express as the REST API backend.
- Implemented a complete Jenkins CI/CD pipeline with automated build, test, and deployment stages triggered on every GitHub push, achieving zero-downtime deployments.

- Configured multi-container networking, environment variable management, and persistent volume storage following production DevOps best practices.

Bank Management System

2024

[Java](#) · [MariaDB](#) · [Terminal-based CLI](#)

- Developed a terminal-based Bank Management System in Java with full account lifecycle management including account creation, deposits, withdrawals, transfers, and transaction history.
- Integrated MariaDB for persistent data storage with optimized SQL queries for transaction processing and account balance management.
- Implemented input validation, exception handling, and secure authentication logic following object-oriented design principles.

Ransomware Detection System

2026 — In Progress

[Python](#) · [eBPF](#) · [Machine Learning](#) · [Dashboard](#)

- Designing a kernel-level ransomware detection system using eBPF hooks to intercept and monitor real-time filesystem syscalls for suspicious patterns.
- Integrating an ML classification module trained on ransomware behavioral signatures with automated alert logging and a live monitoring dashboard.

EDUCATION

Guru Nanak College of Arts, Science and Commerce (Autonomous), Mumbai

2023 – 2027

[Bachelor of Science in Information Technology \(BSc IT\)](#)

CGPA: 7.50 / 10.00

- Relevant coursework: Data Structures, Operating Systems, Computer Networks, Database Management, Software Engineering, Cloud Computing.

CERTIFICATIONS

- **IBM SkillsBuild / CSRBBOX / AICTE — Apr 2026** AI Strategy & Business Intelligence Internship
- **Citi / Forage — May 2026** Technology Software Development Job Simulation
- **Deloitte / Forage — Apr 2026** Technology Job Simulation
- **Tata / Forage — Mar 2026** Data Visualisation: Empowering Business with Effective Insights
- **IBM SkillsBuild — Nov 2025** Artificial Intelligence Fundamentals

KEY ACHIEVEMENTS & ACTIVITIES

- Built and deployed 3+ production-grade DevOps projects integrating AI/LLM capabilities into real CI/CD workflows.
- Completed 4 industry simulations with top global firms (Citi, Deloitte, Tata, IBM) demonstrating business and technical acumen.
- Actively building open-source DevOps portfolio on GitHub (@Ekaanksh-dev) with documented projects and READMEs.
- Self-taught in eBPF, kernel-level security monitoring, and AI agent development beyond academic curriculum.
